

APPENDIX N

Ideal PhD timeline

The processes reflected here are *ideal* but not standard. Some students may move through some stages more quickly; some students may move through some stages more slowly. When you have your first meeting with a student as chair/member of the guidance committee, you should map *their* ideal timelines for finishing the program as a *guideline* for the next few years. Things will change, of course, and you'll adjust the timeline. The important thing is that a student's map for finishing the program does not exceed their guaranteed funding package (4 or 5 years).

YEAR ONE
